Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-18 have been examined.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Dworkin (U.S. Patent No. 4,992,940).

Claims 1, 7, 13. Dworkin teaches:

- (a) receiving a request for information about an item (Abstract);
- (b) parsing the request for determining attributes of the item (Abstract);
- (c) searching a database for selecting a plurality of products each having the attributes of the item (Abstract);
- (d) retrieving information about the products (Abstract); and
- (e) outputting the information about the products (Abstract).

Claims 2, 8, 14. Dworkin teaches the plurality of products have been pre-associated based on the attributes (Abstract).

Claims 3, 9, 15. Dworkin teaches the information about the products includes a name of a vendor of the products (Abstract).

Claims 4, 10, 16. Dworkin teaches criteria for selecting the vendor include at least one of price of the products, proximity to the vendor, availability of delivery, whether the products are in stock, wrapping availability, shipping availability, tracking availability, and a loyalty program (Abstract).

Claims 5, 11, 17. Dworkin teaches the information about the products includes a name of a plurality of vendors of the products (Abstract).

Claims 6, 12, 18. Dworkin teaches a promotional offer is output with the information about the products (col. 9 lines 36-48).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Prior art includes:

- Bezos et al. (U.S. Patent No. 6,029,141) that teaches an Internet-based referral system that enables individuals and other business entities ("associates") to market products, in return for a commission, that are sold from a merchant's Web site. The system includes automated registration software that runs on the merchant's Web site to allow entities to register as associates. Following registration, the associate sets up a Web site (or other information dissemination system) to distribute hypertextual catalog documents that includes marketing information (product reviews, recommendations, etc.) about selected products of the merchant. In association with each such product,

the catalog document includes a hypertextual "referral link" that allows a user ("customer") to link to the merchant's site and purchase the product.

- Beck et al. (U.S. Patent No. 6,138,139) that teaches a programmable diverse interaction code module (DIM) in an enterprise-hosted multimedia call center (MMCC) that facilitates and monitors diverse interactions between parties communicating through the MMCC, and includes a database interface for access to an MMCC data repository; and an association facility for associating parties to transactions with agents and projects. The association facility assigns association identifiers to parties according to defined projects and issues, and the database interface stores transactions in the data repository. Parties to transactions include customers and business associates remote from the MMCC and agents and knowledge workers local to the MMCC, and transactions are supported in any combination between any parties.

- Baker et al. (U.S. Patent No. 6,338,067) that teaches a product hierarchy database that organizes company market performance and stock investment information by the products and services produced and offered by each competitor. The companies that produce each product/service are relationally linked to each of their products/services through records. An investment information service includes the product/service hierarchy database and makes it accessible to investor and analyst subscribers through a query system across the Internet.
